

## Everything you need to know about the patent for freight in 2013

All items start here In 2013, our country has earned the patent system is one of the most anticipated innovations. Its appeal is that it greatly simplifies the relationship with the tax authorities. Article 346.25 NK 1 transportation belong to the activities allowing the use of the patent. Everyone is interested in the value of a patent for transportation but you must first understand the main provisions of the Law. To obtain a patent on trucking 2013 become an individual entrepreneur then contact the tax office a statement about the desire to move to a different system of taxation. It is important to note that a patent is valid only to the subject of the Federation where it was issued. To work in multiple regions will have to obtain a patent in each of them otherwise you have to pay taxes according to different tax regimes. If we are talking about delivery of the goods to another region special patent for this region is not needed. The law allows you to deliver the goods in other regions within the same patent. The patent issued to the taxpayer for a period of one month to one year. If you wish, you can not take a patent for months when not working. It is very convenient for seasonal work. A patent can be combined with other tax systems because it is issued for a specific activity. The number of employees is limited you can only afford to hire 15 people. In each region the value of a patent depends on the decision of local authorities. It remains in force during the year. If the law of the subject of Federation has not changed the income for the next year there is amount installed the previous year. The patent system of taxation for transportation requires a minimum yield of 100 thousand and maximum one million. Therefore at the rate of 6%, the minimum value of a patent 6 thousand rubles and a maximum of 60 thousand rubles per year. When the patent for a period of less than one year, the tax amount is calculated by dividing the potential annual income by 12 and multiplying by the period of validity of the patent. So you got a rough idea of the cost of the patent, let's take Moscow and the Moscow region. Local authorities suggest the yield from cargo of 600 thousand rubles a year, hence the value of a patent to 36 thousand rubles per year. The value of a patent on trucking 2013 for your region, you can find on the official website or tax inspection at the place of registration. Up
