

The patent and the types of activities that are permitted to purchase the patent for individual entrepreneurs

As is familiar to many entrepreneurs the feeling of hatred towards the payment of obligatory taxes. They are cumbersome and sometimes they pay you out large part of the revenue. How to make a legal way not to pay some of the tax calculations On this and other issues we describe in our article. Since the beginning of 2013 there was an excellent opportunity for SP. Now they have the ability to make tax payments using the patent system. Let us quickly look at what is interesting, the system of taxation and that it will be necessary to account for all budding entrepreneurs. The patent system of taxation is a special mode of payment of tax estimates which are intended for sole proprietors. A definite plus when introducing and using this type of ease of doing business is something that can be applied together with such tax estimates as the Simplified taxation system or the Unified tax on imputed income. Draw your attention to the fact that a legal entity with organizational and legal forms of activities You do not have the right to apply this special regime which is not typical for the above listed forms of tax payments. Buying patents is beneficial only if your real income from production will be greater than the potential income the patent. Is to pay tribute to the legislative bodies of our country and indeed the state as a whole for giving the opportunity to develop small enterprises and individual entrepreneurs. In this case, the number of activities eligible for a patent more than 70 types but we should not delude ourselves as all these activities are interlinked with activities in the service sector And in the service sector There are also several categories which can be attributed to retail trade, but these little items The requirement there is only one and it consists in the fact that to permit the grant of a patent are entitled to only those businesses whose income per year does not exceed sixty million rubles and the number of their employees does not exceed fifteen people. Draw your attention to the fact that for each employee to pay the premiums, the insurance type which will be transferred to the pension funds and health insurance. Also every industrialist who acquired the patent it is necessary to conduct the books of account of the company's revenue. 12 months. In the case if you have made the patent for a period of less than one calendar year, the tax calculation will be made on this date. In order to better understand this. We decided to give you a clear example. Look let's assume you purchased a patent, or plan to purchase it in October. It would be logical
