

The patent for the online store

Is it possible to get a patent for PI in the online shop This question is asked by many budding entrepreneurs decide to start their own business. The patent system has recently become very popular among entrepreneurs. Choose it for It is obvious that for many entrepreneurs, patent a great solution even though a certain number of disadvantages independence of patent value income advance payment restrictions on the income of all employees by number of kinds of activity, and region. Unfortunately the patent for the online store to fail because according to the PP. 1 paragraph 3 of article 346.43 of the Tax Code sale of goods on samples and catalogues outside the stationary trading network, including in the form of a postal mail-order sales as well as through TV telephony and computer network does not apply to the retail trade. Accordingly, when selling through teleshopping, computer network, phone calls, followed by sending of the goods to the address of the buyer should choose a different system of taxation. As for the patent for the program is online store Such programs are developed hundreds of new someone is using open solutions. It turns out that the program itself does not have the know-how and therefore cannot be patented. Am I right And with respect to copyright on software online store After all, according to the armed forces the specified Results of intellectual activity subject to legal protection if they meet the conditions of patentability which is governed by the applicable provisions of the civil legislation. ie, if I as the programmer wrote another online shop copyrights I'm not getting on it Is another. The article says the patent system of taxation. The name required Mail will not be published
